FREE DEMO OF TRUCKING INDUSTRY SOFTWARE NOW AVAILABLE

TruckSafe and Tamari Software and Technology have today released a demonstration version of TruckSafe Manager, the complete business management and accreditation software solution for the trucking industry.

The fully functional demonstration of the software allows users to try out the program for 14 days to determine if it is right for them. Once the full version is purchased, all data entered during the trial period will be available.

TruckSafe Manager makes it affordable for every trucking company to replace their inefficient paper-based records. Until now, trucking companies have had to pay thousands or tens of thousands of dollars to install computerised systems.

With TruckSafe Manager, every trucking company, large and small, can afford to:

- computerise their workshop maintenance management;
- eliminate repetitive paperwork, with cross checks to reduce the chance of expensive mistakes;
- easily develop and maintain written maintenance procedures;
- track maintenance spending;
- manage their compliance paperwork in one place; and
- with the optional inventory control module, track their parts and inventory across multiple sites.

“TruckSafe Manager is fully integrated into the TruckSafe program, the trucking industry’s safety accreditation system. Both new and existing TruckSafe members who have the software automatically qualify for the TruckSafe Manager Members’ Upgrade,” CEO of TruckSafe, Stuart St Clair, said.

“The Members’ Upgrade includes all the TruckSafe manuals and procedures as part of the software. It’s the simplest way for operators to create or maintain their TruckSafe-compliant company manuals.

“And because TruckSafe Manager is Australian-made, the program can be customised to suit trucking companies both now and as their businesses grow,” Mr St Clair said.

TruckSafe is the trucking industry’s business and safety management scheme. Hundreds of companies are now use the procedures to become safer and more competitive, with independent statistics showing that TruckSafe companies are twice as safe as non-accredited companies.

TruckSafe Manager costs \$660 (incl. GST) plus an optional yearly fee after the first year for help desk support and updates. For more information, contact TruckSafe on 02 6253 6900 or visit www.trucksafe.com.au to download the free demo of the software.
